I am Budi Prasetio, undergraduate degree in computer engineering. I am addicted to technology, and always interested in trying new things. I am more interested in Web Development. Using react vite as front end and express js backend for my project work. I am always looking for opportunities to improve my skills and contribute to innovative web development projects.

Education

Batam Institute of Technology   Aug 2020 - Present

Bachelor of Computer Engineering, 3.70/4.00

- Actively participated as Computer Engineering Student Association
- Engaged in various campus events and organizations in IT support

Work Experiences

Mentor Technical Web at Infinite Learning Indonesia - Nongsa Digital Park   Aug 2023 – July 2024

Contract

- As a technical mentor, I taught my mentee how to create a website properly using HTML, CSS, Javascript and also with ReactJs. and I also taught my mentee about backend with ExpressJs Framework with MySql database.
- Developed a cutting-edge programming and web development curriculum tailored to current industry standards.
- Trained fresh graduates, junior developers, and mentees to enhance their skills, ensuring they become proficient Web and UI/UX Developers.
- Produced high-quality web developers from both IT and non-IT backgrounds through comprehensive training programs.
- Actively involved in various educational initiatives, including Bootcamp Frontend Web Development, Man IC Batam Students, and SMK 1 Batam Teachers training programs.
- Ensured students gain essential knowledge and skills, commit to continuous learning, and effectively convey their expertise.
- Fostered collaboration, communication, and critical thinking skills among students, empowering them to make meaningful contributions to the industry and society.

MSIB Hybrid Cloud A.I at Infinite Learning Indonesia - Nongsa Digital Park   Feb 2023 – July 2023

Mentee

- As a mentee I learned in depth the use of Linux commands. Learning to manage data management through RedHat Linux, we also created a Container. Implementing AI to create a Chatbot using Watson Assistant and Watscon Discovery.
